SIEMENS

Sinteso™ / Cerberus™ PRO

ASD Aspirating smoke detector

FDA261, FDA262

Siemens aspirating smoke detector (ASD) for the addressed FDnet/C-NET detector line or for standalone operation

- Patented technology
- Early detection of a wider spectrum of particle sizes in the air
- Two independent detection chambers
- Configuration via a wireless interface using an app
- 'ASD Asyst Tool' software to assist with pipework configuration
- Intuitive front indicator for airflow and smoke value
- Cloud-enabled
- Modular design
- Different event protocols
- Offline/online configuration supported
- Slots for additional relay and 4...20mA cards

Properties

- Extended optical detection thanks to dual wavelengths (blue and infrared): The aspirating smoke detectors FDA26x use dual-wavelength technology to trigger an alarm at the earliest possible moment. They are designed to protect a huge range of equipment for monitoring areas of up to 6700 m^2.
- The detectors continually suck in air through a pipe system via their aspirating holes. The air is fed into a patented detection chamber, in which tiny smoke particles are detected by scattered light.
- Lower mounting and service costs: The aspirating smoke detectors FDA26x can be used on an FDnet/C-NET detector line.
- The aspirating smoke detectors FDA26x are configured via a wireless interface or a USB interface using an app. All detector configurations, maintenance work, and alarm and fault management processes can be carried out on the device directly.
- 'Out-of-the-box' mounting and commissioning: Installation is simple thanks to combined functions for normalizing smoke values and airflow, as well as appropriate presettings for alarm and fault thresholds.
- ASD filter box FDAZ292 available as an accessory: Dust and other dirt is filtered out of the aspirated air and does not get into the aspirating smoke detector. The filters in the ASD filter box are easy to replace.
- Detection chambers and aspirators are replaceable.
- The display can be rotated by 180° for mounting.

Use

Using aspirating smoke detectors

Aspirating smoke detectors are used for early detection of smoke-generating fires in rooms and equipment. They are suited to applications in which point detectors are pushed to their limits, cannot be used or can only be used with restrictions.

The aspirating smoke detector continually removes air from the room being monitored through the connected pipe systems via defined aspirating holes. The air is supplied to the detection chambers, where detectors analyze it for smoke particles. The sensitivity of the detectors can be adjusted.

The 'FXS2056 ASD Asyst-Tool V3' software calculates the position and size of the aspirating holes. The calculation ensures that the air passes from the aspirating hole to the detector in the time specified and with the calculated sensitivity.

Examples of use

- Cavities such as false ceilings or false floors
- Clean rooms
- Rooms the height of which is greater than that permitted for point detectors
- Rooms with electromagnetic fields which influence the function of point detectors
- Large rooms such as storehouses or factory halls
- Separate monitoring of control cabinets and electronics cabinets
- Data centers
- Telecommunication centers
- Assembly lines
- Cable tunnels
- Conveyor belts

Applications with a filter box

- Rooms with polluted air in which the pollution has impaired the performance of optical point detectors
- Assembly lines
- Recycling facilities
- Cement factories
- Mining industry

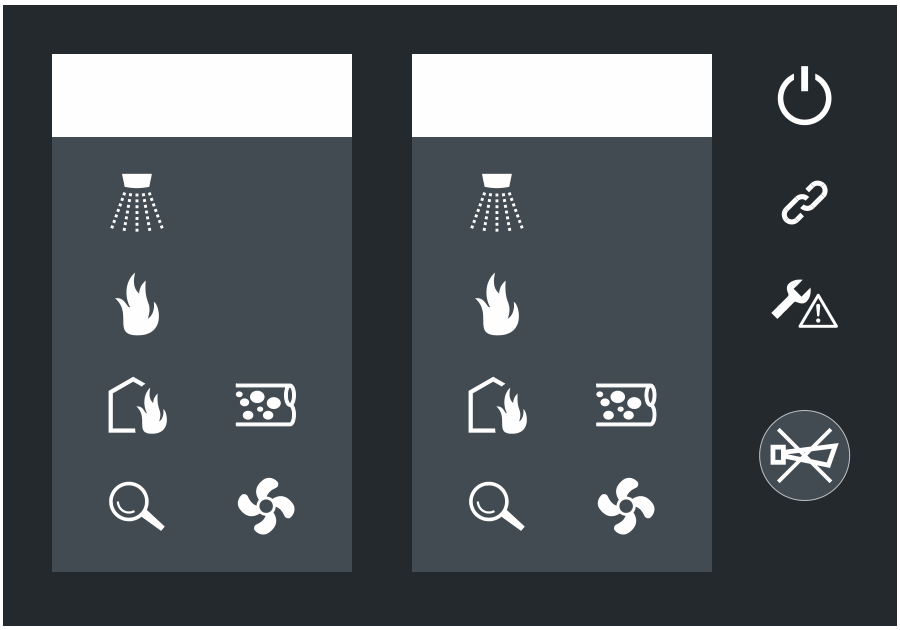
- Subway stations
- Agricultural operations
- All other applications with visible dust load

Functions

Front indicator

The front indicator shows device statuses.

- Alarm level
- Dust
- Airflow
- Label field
- Operation
- Connection
- Fault
- Buzzer



Status indicators

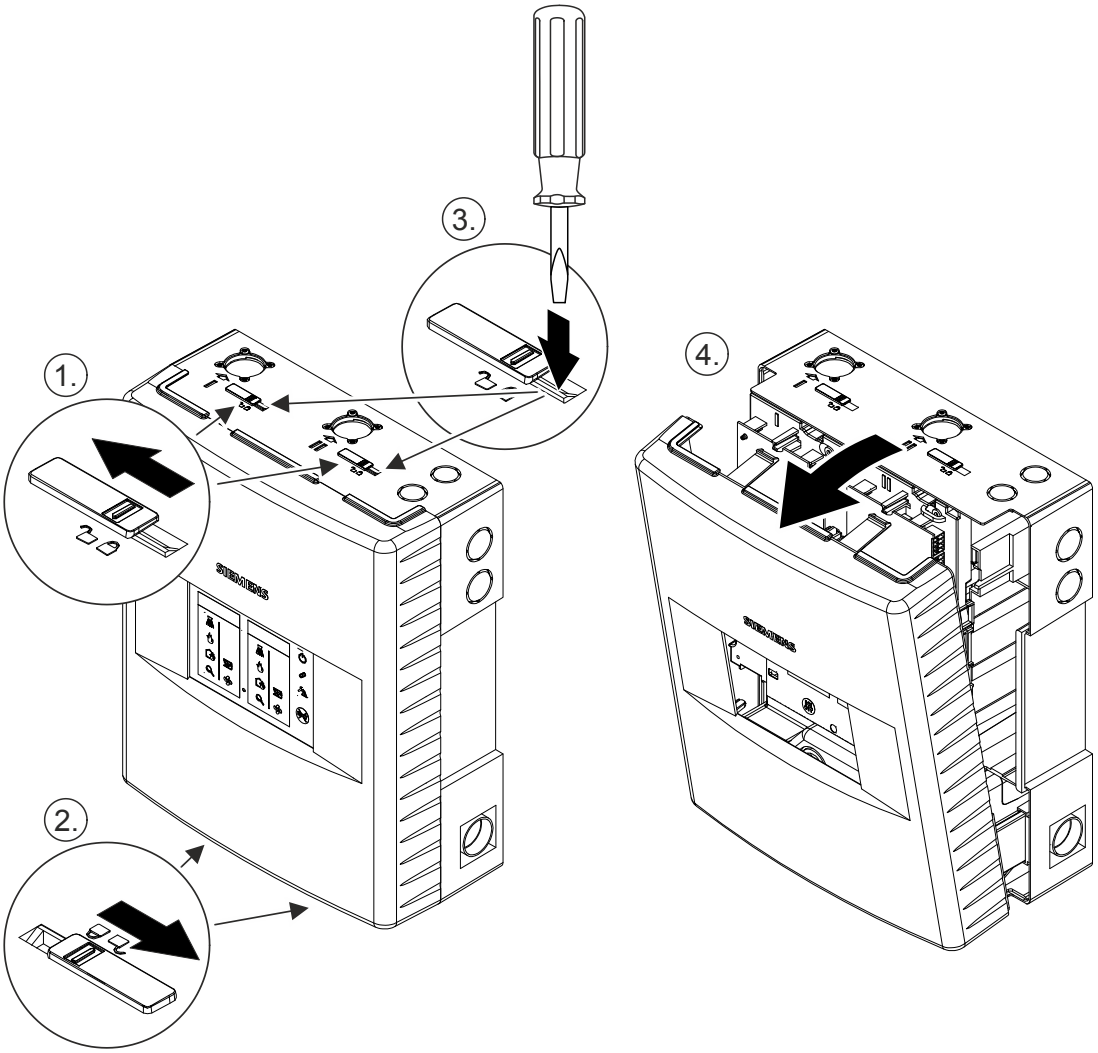
		Label field			
	Fire 2				Operation
	Fire 1				Connection
	Pre-alarm		Dust		Fault
	Early warning		Airflow		Service button

Opening the aspirating smoke detector

Open the housing to access the service area:

- Move two sliders at the top and bottom into the position.
- Push in the two lugs at the top with a screwdriver.

- Tilt the cover forward at the top and remove.

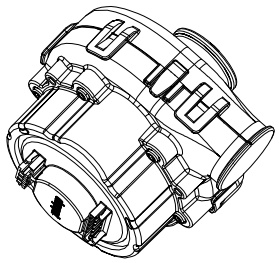


Accessories

FDAZ295 relay card	
	● Accessory for the aspirating smoke detectors FDA261, FDA262 ● Extension card with 6 relay outputs

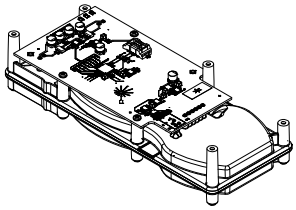
FDAZ296 4...20mA card	
	● Accessory for the aspirating smoke detectors FDA261, FDA262 ● Extension card with two 4...20 mA outputs

FDAS292 aspirator (FDA261, FDA262)



- Spare part for the aspirating smoke detectors FDA261, FDA262
- Brushless DC motor (with ball bearing)

FDAS291 detection chamber (FDA261, FDA262)

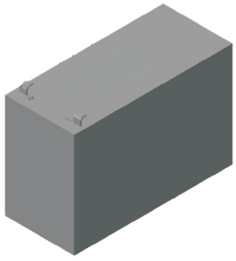


- Spare part for the aspirating smoke detectors FDA261, FDA262
- Calibrated detection chamber for replacement on-site

Power supply kit FP120-Z1

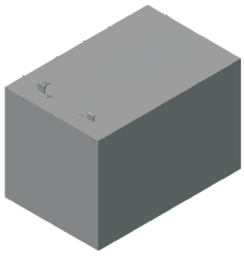
- Standalone power supply (70 W)
- Supply to external devices and components as per EN 54-4 and VdS
- With operating and fault indicator, shown via a green and a yellow LED
- With potential-free relay contacts for fault messages
- Additional installation of an I/O module possible
- Uninterruptible power supply with battery charging
- Batteries: max. 17 Ah
- Dimensions: (W x H x D) 430 x 399 x 124 mm

Battery FA2003-A1 (12 V, 7 Ah, VdS)



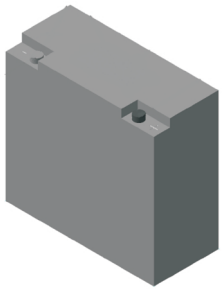
- For supplying power to fire control panels and aspirating smoke detectors
- Compatible with:
  - Fire control panels for the 'Sinteso' and 'Cerberus PRO' product lines
  - External power units for the aspirating smoke detectors

Battery FA2004-A1 (12 V, 12 Ah, VdS)



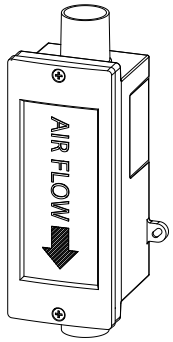
- For supplying power to fire control panels and aspirating smoke detectors
- Compatible with:
  - Fire control panels for the 'Sinteso' and 'Cerberus PRO' product lines
  - External power units for the aspirating smoke detectors

Battery FA2005-A1 (12 V, 17 Ah, VdS)



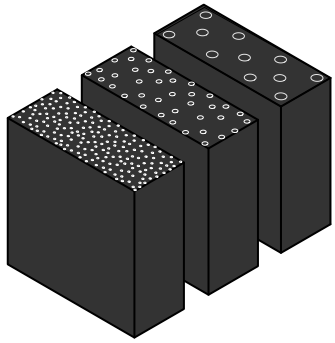
- For supplying power to fire control panels and aspirating smoke detectors
- Compatible with:
  - Fire control panels for the 'Sinteso' and 'Cerberus PRO' product lines
  - External power units for the aspirating smoke detectors

FDAZ292 ASD filter box



- Filter box for installation in the pipe system for aspirating smoke detectors
- Filters dust and other dirt out of the air aspirated by the aspirating smoke detector
- Minimizes internal contamination of the aspirating smoke detector
- Contains filter set FDAZ292-AA with three filters, coarse, medium, fine
- Compatible with the aspirating smoke detectors
- You will find more information in document A6V10877841

FDAZ292-AA ASD filter set



- Spare part for the ASD filter box FDAZ292
- Filter set contains one coarse filter, one medium filter, and one fine filter

Type Overview

Type	Designation	Order number	Weight [kg]
FDA261	Aspirating smoke detector	S54333-F101-A1	2.625
